Data-driven cleaning technology to win new business and stretch scarce labor resources

Clean more. Spend less.

**Example**: 500,000 ft^2 building with $700,000 annual contract & 15 cleaners

Data insights: 35-40% daily occupancy

Results: Traffic and utilization data shows space can be cleaned with two fewer staff & reallocated resources

Return on investment: Increase margins and 22% more flexibility for resource allocation

Increase margins

24% improvement in customer satisfaction

36% improvement in response time

18% labor savings

Proven in deployments across multiple industries
in hospitals, universities, retail, offices & entertainment venues

Bolster wellness

Demand-based cleaning

Occupancy monitoring

Reduce cost

Improve profitability

Predictive insights

Real-time user feedback

Leak detection

Decrease risk

Benefits

- Win new business by differentiating from competitors with cutting-edge technology

- User feedback to deliver real-time insights and information improving tenant satisfaction

- Track performance of cleaning contractors with arrival history

- Gain insights on usage of space (breakrooms, washrooms, conference rooms)

- Gather insights for ESG compliance

- Meet SLAs in a tight labor market
