

Asset Zoning

Productivity, efficiency, stop-loss

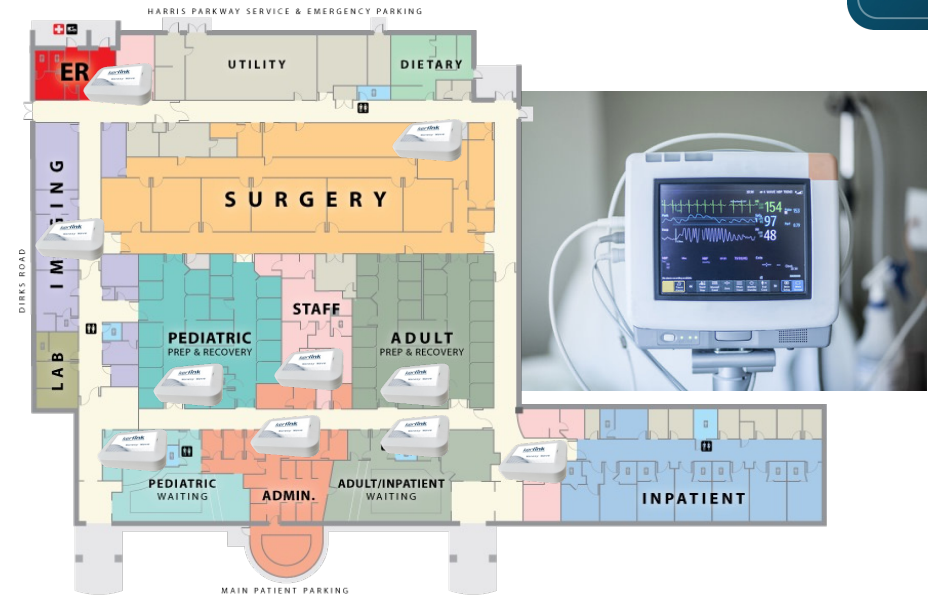

Q2 2023

Asset Zoning prevents wasted time and money

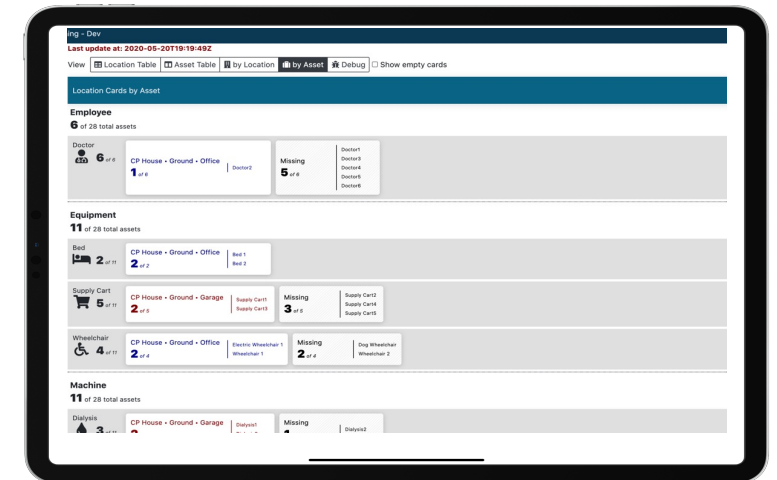

Microshare's Asset Zoning solution pinpoints mobile equipment and assets in a healthcare environment diverts scarce resources from areas like building maintenance, security and even patient care. Proven in warehouses, hospitals, universities and retail settings worldwide. Improved data insights on asset utilisation leads to savings on capital expenditure and labor.

Use cases

- 1. Productivity:** Locate items to save staff time and effort. Up to 15% staff time saved. Increases productivity and staff morale
- 2. Stop-loss:** Alerts staff when assets leave designated area to prevent theft and loss. On average 68% increased inventory accuracy.
- 3. Cost savings:** Avoid duplicative procurement of equipment which is not lacking, just hard to find.

Asset Zoning for healthcare, logistics, hospitality and more

Using inexpensive, long-life battery-operated sensors, Asset Zoning dashboards track your expensive and vital mobile equipment and provide precise locations 24/7.

Typical deployments

Hospitals: Wheelchairs, IV and blood pressure machines, mobile beds, catering and cleaning equipment.

Hospitality and Catering: Service carts, hand-trucks, luggage carts, warming trays, cots, tables and chairs

Retail: Shopping carts, pallets, hand carts, storage bins, cleaning equipment

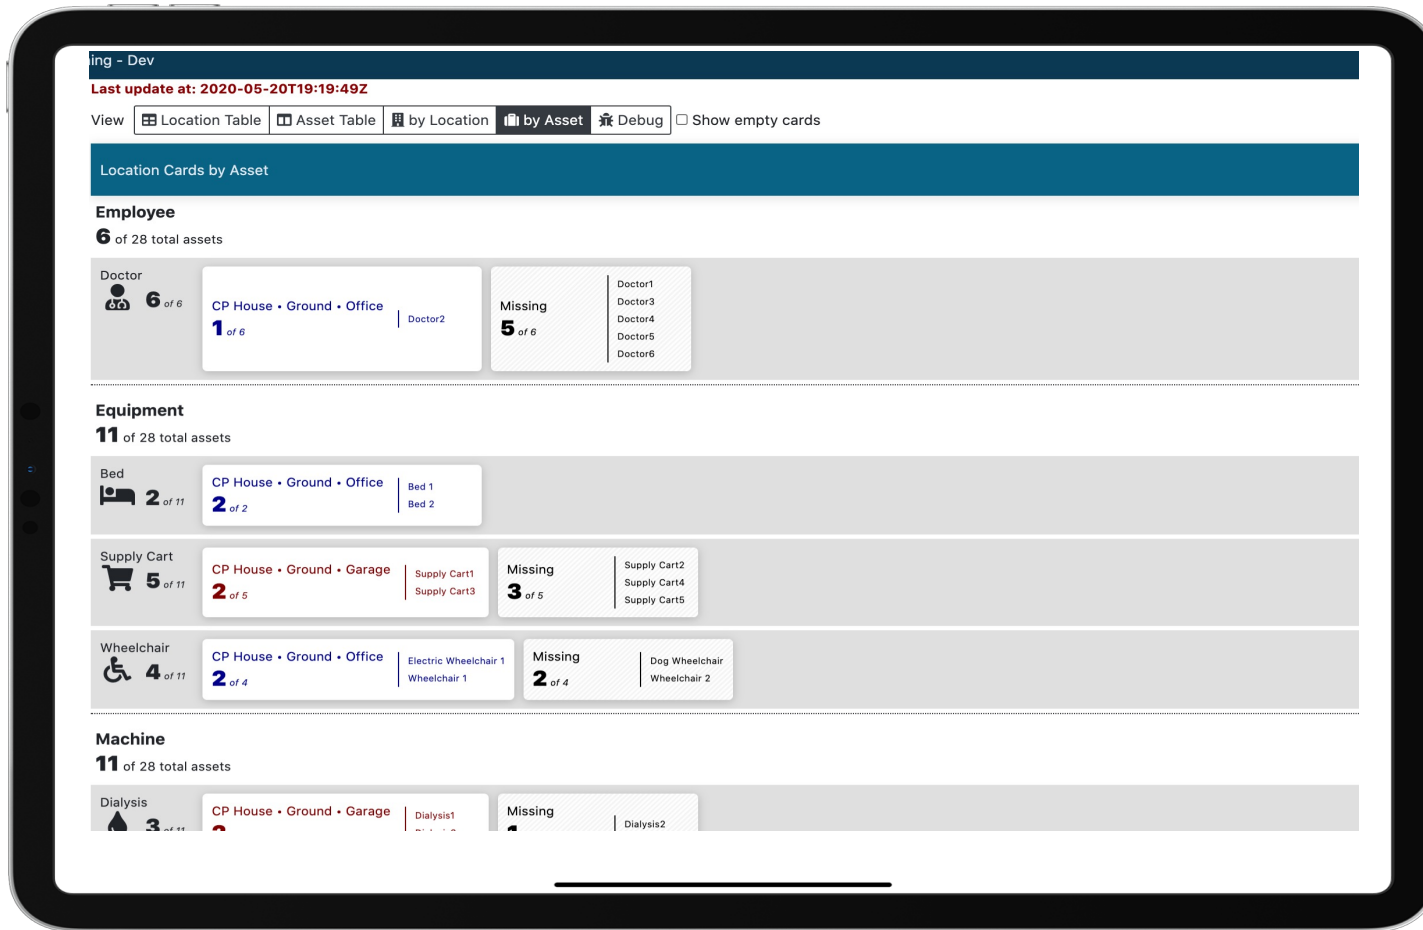

Warehousing: Pallets, hand-trucks, hand-held power tools, mobile toolboxes and more ...

Dashboards customized for your facility

Using inexpensive, long-life battery-operated sensors, Asset Zoning dashboards track your expensive and vital mobile equipment across your specific facility and provide precise locations 24/7.

'With Microshare we have been able to reduce the time taken to locate vital hospital equipment by 30%, saving us over £300,000.'

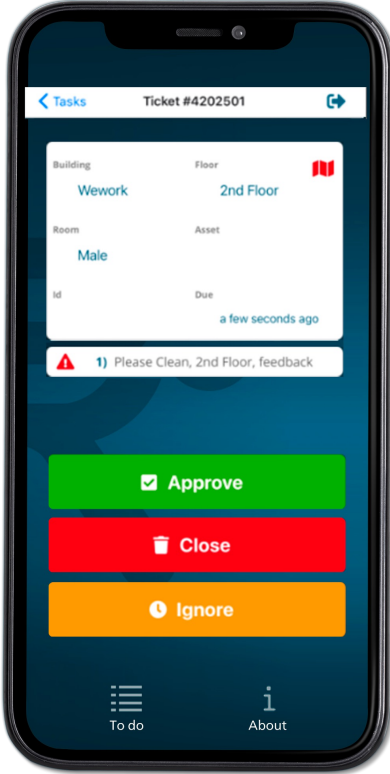

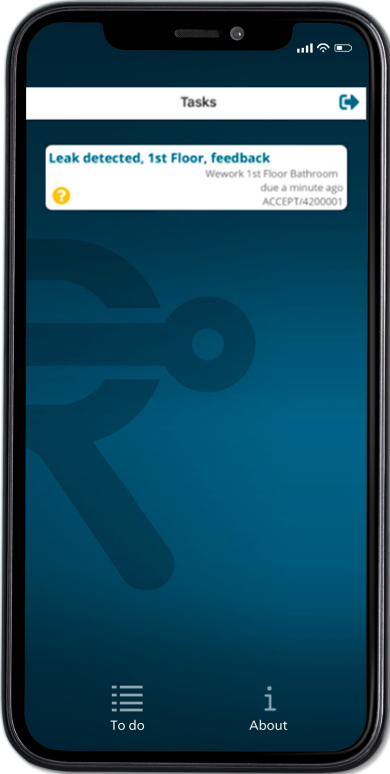

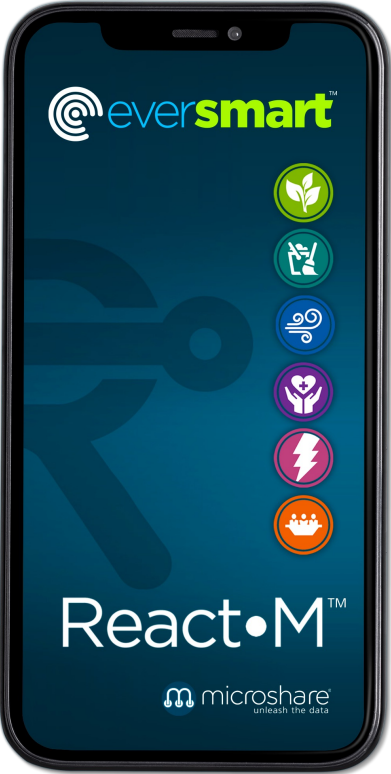

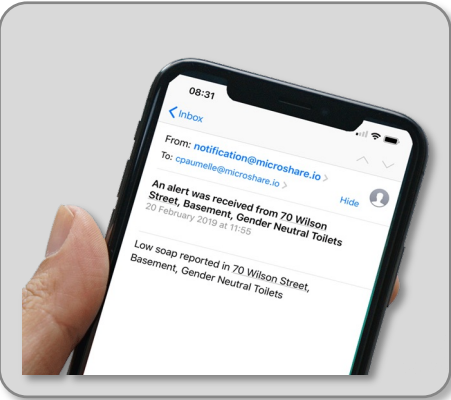

Toby Roberts, CIO, Royal Hospital for Neuro-disability, London

React-M and configurable alerts

The React-M app enables staff to quickly access dashboards to locate equipment.

SMS or email alerts can be routed to select staff for stop-loss purposes.

Microshare's React-M is our phone app that provides alerts and notifications to staff for critical events which occur in EverSmart Suite products.
